Test Results Information Sheet
Midge Tolerant Wheat Refuge Verification

Enclosed with this Information Sheet is your *Refuge Verification for Midge Tolerant Wheat Certificate* with test results from the SRC's GenServe Laboratories™ and a *Refuge Declaration* (CSGA Form 182) from the Canadian Seed Growers' Association (CSGA).

To receive a CSGA crop certificate for this field, send a copy of the *Refuge Verification Certificate* and a completed *Refuge Declaration* to the CSGA office.

The percent (%) of midge Tolerant Seeds and percent (%) of Refuge Seeds in your sample are indicated on the *Refuge Verification for Midge Tolerant Wheat Certificate* (as below).

Test Results:	% of Tolerant Seeds	% of Refuge Seeds
	87.3	➔ 12.7

Report the percent (%) of Refuge Seeds on the *Refuge Declaration* that you submit, with a copy of the *Refuge Verification for Midge Tolerant Wheat Certificate*, to the CSGA office

For seed crop certification, the percent (%) of Refuge Seeds must be within the Acceptable Ranges (below) which are set (with no additional tolerances) by the variety developers of midge tolerant wheat varieties.

Eligible Class	% Refuge Seeds
Breeder	9.4 - 10.6
Select	7.2 - 13.0
Foundation	6.2 - 14.4
Registered	6.2 - 14.4
Certified	5.2 - 16.0

To complete the enclosed *Refuge Declaration* (CSGA Form 182), enter your field information (Field ID, Crop Sequence Number and CSGA Grower Number), report the percent (%) of Refuge Seeds and sign the declaration. Once the *Refuge Declaration* is completed, attach a copy of the *Refuge Verification for Midge Tolerant Wheat Certificate* and send both to the CSGA office address below via email, fax or hardcopy. CSGA requires both documents to issue a crop certificate.

- Send a copy of the *Refuge Verification Certificate* (from the lab) and a completed *Refuge Declaration* (CSGA Form 182) to:
