

Fababeen – Select Plot Production

General Requirements for All Pedigreed Seed Crops

The basic standards for all crops are set out in [General Requirements for All Pedigreed Seed Crops](#). The basic standards for all plots are set out in [General Requirements for Plot Production](#). In addition, the following standards apply to Fababeen.

Land Requirements

Inspected Crop	Must NOT be grown on land which:
Select	In the previous year produced: <ul style="list-style-type: none"> • a non-pedigreed crop of Fababeen. • a crop of a different variety of Fababeen. • a Foundation, Registered or Certified crop of Fababeen.

Crop Inspection

Fababeen plots must be inspected at flowering.

Crop Standards

Isolation

Minimum Isolation Distances Required from an Inspected Crop to Other Crops:

1. Varietal Purity	Distance
a. Inspected pedigreed Fababeen of same variety	3 meters (10 feet)
b. Different varieties of Fababeen or non-pedigreed Fababeen	100 meters (328 feet)
c. Inspected pedigreed Fababeen of same variety contaminated with off-types or other varieties of Fababeen	100 meters (328 feet)
2. Mechanical Purity	Distance
a. Bean, Chickpea, Lentil, Lupin, Pea, Soybean	3 meters (10 feet)

Maximum Impurity Standards

1. **Varietal Purity** (off-types/other varieties on average in 20,000 plants)
 - a. Select - 5
2. **Mechanical Purity** (other crop kinds, the seeds of which are difficult to separate from the seeds of the inspected crop, on average in 20,000 plants; for Fababeen that includes Bean, Chickpea, Pea and Soybean)
 - a. Select - 1
